

# **Help kids like Heather...*Donate Blood!***

**Heather** had a malignancy at age 5 that ultimately required the removal of several organs. You may not know someone with cancer or leukemia, but there are many reasons why people need blood in our community. New York is home to some of the best hospitals in the world - with big blood needs. There is no substitute for human blood, with about 1 in 7 hospital admissions requiring blood transfusions. Please join us for our spring blood drive, roll up your sleeves and give to those in need.
